

Vice President - Product Development & Manufacturing - Medical Devices

Company overview:

We are a leading medical electronics enterprise specializing in the development and manufacturing of advanced ophthalmic devices. Established in the early 1990s, with a manufacturing facility in Electronic City, Bangalore (operational since 1995), we have built a strong reputation for delivering innovative and reliable solutions for the ophthalmic community in India. Our product range includes A- Scan Biometers, B- Scan Ultrasound systems for cataract and retinal disease management, and Phaco Emulsification Systems for ophthalmic surgeries. Over the years, we have established deep collaborations with global industry leaders, enabling exclusive partnerships for sales, marketing, and after- sales service. With a strong emphasis on R&D, we have successfully developed next- generation technologies such as Optical Coherence Tomography (OCT) systems, supported by international collaborations and government innovation programs. Our focus today is on creating affordable, high- quality devices tailored to the Indian market, combining in- house expertise with global sourcing. We remain committed to advancing accessible, world- class vision care solutions.

The Candidate

We are looking for a young, well qualified and highly motivated individual to take on the position of Vice President and take charge of the above- mentioned activities. We would like to hire a candidate with an entrepreneurial attitude.

The position is falling vacant due to the impending retirement of the present incumbent in 2025.

It is essential that the candidate should find the job content interesting, gratifying and would look forward to longevity of service, other things being normal.

The company is also outward thinking and willing to consider other innovative methods to ensure that the candidate is happy with his employment and remuneration.

Work experience as a system specialist in a Medical Device company will be a distinct advantage.

This experience will give the candidate a good overall multi-disciplinary understanding in dealing with new product development.

Qualification

The candidate would have excelled in the tenure of his formal education and is naturally seeking excellence in all his activities.

He will also be familiar with various standards of the global regulatory systems and be able to maintain an adequate quality system.

We would expect the candidate to have an educational background and qualification from

any of the highly reputed technological institutes. The formal education and experience

needs to be multifaceted involving Electronics Hardware, Embedded Solutions, Software/ Image Processing / Integration and so on.

The candidate could have core expertise in a specific area but needs to have an active

interest in multiple disciplines which are needed for designing, developing and integrating medical devices.

He should have a natural interest in state-of-the-art technological developments and a good understanding of the technical feasibility of the medical device industry & ecosystem.

This would be a wonderful opportunity for a candidate looking for challenges and leading a team to achieve the set goals. As VP he would be in overall charge of all the activities of Development of new products & manufacturing.

Work Experience:

Prior work experience in the Medical and Healthcare devices domain would be essential.

We would expect the candidate to have 10-15 years of experience spanning over electronic hardware, embedded solutions, software development, image/signal processing, AI, algorithm development, integration etc.

The fields that are indicated above are for illustrative purposes only.

The State-of-the-Art Technologies today would need proficiencies in the latest development tools, working towards building an eco-system of Artificial Intelligence and Machine Learning, to get maximum results out of biological signals and images derived out of diagnostic devices.

Have the ability to build & lead an effective team

We are looking for a candidate who can lead us towards achieving our goals and also build a long-term association for maximum integration of objectives.

Age:

40 with over 15 years of work experience (These are only indicators and shall not be a limiting factor.

We are flexible on the age of the candidate)

Remuneration:

Will be commensurate with the industry norms and the candidate's expectations. We are open to discussions on this subject to ensure continuing rewards for his achievements.
